SUBJECT INDEX

acridine, sensitivity of bacteriophage T2H in *Escherichia coli*, 543
actinomycin D, effect on interferon action, 1158
actinomycin D, effect on ribonucleic acid polymerase formation, 1130
adeno-associated satellite virus, nucleic acid of, 980
adeno-associated virus, replication, 648
adeno-satellite virus, defective, assay and growth, 171
S-adenosylmethionine-cleaving enzyme, in *Escherichia coli*, 57
adenovirus, attachment and eclipse of, 868
adenovirus, defective monkey cell-adapting component in, 876
adenovirus, enzyme induction by, 10
adenovirus, inhibition by fiber antigen, 747
adenovirus, N-terminal amino acids of, 723
adenovirus, satellite, assay and growth, 171
adenovirus, virus-specific ribonucleic acid, 576
adenovirus deoxyribonucleic acid, uncoating of, 851
adenovirus infection, effect on host cell proteins, 843
adenovirus type 7-simian virus 40 hybrid, role in transformation, 1109
adenovirus type 9 components, soluble, 1101
adenovirus type 12, effect on embryonic kidney cells, 1174
adenovirus type 12 oncogenesis, resistance to, 1186
adenovirus type 12-rat embryo transformation system, 362
adenovirus type 12 replication, 817, 1010
adenovirus type 12 tumor antigen, antibody to, 678
adenoviruses, enhancement of replication, 838
Agalla constricta, wound tumor virus in, 1052
aggregation, cause of non-neutralizable persistent virus fraction, 478
Agrobacterium tumefaciens Conn, bacteriophage $PB2_1$, 268
algae, morphology of virus from, 344
amber mutants of bacteriophages T_2 and T_7, 779
amethopterin, inhibition of virus reproduction by, 1150
amino acid analysis of adenovirus, 723
antibiotics, ferritin-labeled, study of simian virus 40, 384
antibody to adenovirus type 12 tumor antigens, 678
antigens, soluble, vaccinia-infected mammalian cells, 500
antigens of adenovirus type 9, 1101
antigens of herpesvirus during replication, 181
arbovirus, ribonucleic acid polymerase, 97
arbovirus, temperature-sensitive biosynthesis, 128
arboviruses, development in human cell cultures, 996
attenuated viruses, in vitro properties, 453
autoradiography of adenovirus-infected KB cells, 1010
avian infectious bronchitis virus, morphogenesis of, 1019
avian leukosis-sarcoma viruses, cellular resistance to, 898
avian leukosis virus, conversion of chick embryo cells by, 1082
avian myeloblastosis virus, transient inhibition, 1150
6-azauridine, effect on interferon, 450

Bacillus stearothermophilus, bacteriophage T3 of, 610
Bacillus subtilis, bacteriophage functions in, 86
Bacillus subtilis, expression of bacteriophage genomes in, 935
bacteriophage, T-even, induced structural defects, 193
bacteriophage active against *Neisseria meningitidis*, 538
bacteriophage α, viral functions in, 717
bacteriophage χ, infection of *Serratia marcescens*, 445
bacteriophage χ, mechanism of attack, 599
bacteriophage χ, purification and chemistry, 591
bacteriophage functions in *Bacillus subtilis*, 86
bacteriophage genomes, expression in *Bacillus subtilis*, 935
bacteriophage gh 1, deoxyribonucleic acid of, 1274
bacteriophage-induced enzyme synthesis, control of, 92
bacteriophage infection, effect on enzyme synthesis, 57
bacteriophage infection of *Micrococcus lysodeikticus*, 701
bacteriophage lambda, proteins of, 928
bacteriophage lytic enzyme, properties, 617
bacteriophage MS2, ribonucleic acid of, 711
bacteriophage $PB2_1$, inhibition of tumor induction, 268
bacteriophage PBS 1 deoxyribonucleic acid, 841
bacteriophage ϕX174, infectious process, 135
bacteriophage R17, effect on host synthesis of ribosomal ribonucleates, 529
bacteriophage R17, replicative intermediate ribonucleic acid, 523
bacteriophage R17 ribonucleic acid, 793, 804
bacteriophage ribonucleic acid, replication of, 64, 514, 523
bacteriophage sensitivity, chloramphenicol effect on, 50
bacteriophage T2, multitailed, 1087
bacteriophage T2H, acridine sensitivity in *Escherichia coli*, 543
bacteriophage T3, amber mutants of, 779
bacteriophage T3, of *Bacillus stearothermophilus*, 610
bacteriophage T4, deoxyribonucleic acid in, 758, 1193
bacteriophage T4, dihydrofolate reductaseless, 963
bacteriophage T4, effect on *Escherichia coli* lysis, 948
bacteriophage T4, gene transcription by putrescine, 569
bacteriophage T4, photodynamic mutants, 260
bacteriophage T4, polyamine effect on morphogenesis, 559
bacteriophages from *Clostridium tetani*, 1085
bovine papilloma virus, deoxyribonucleic acid of, 1135
Burkitt lymphoma cell line, virus particles from, 640, 1045, 1203
Burkitt tumor cells, comparative study, 830

calcium phosphate, separation of virus variants, 308
canine hepatitis virus, as "helper" in adeno-associated virus replication, 648
carcinogenesis, viral, mechanism, 576
cell receptors, distribution during virus-cell union, 274

chick embryo cells, conversion by avian leukosis virus, 1082
chick fibroblasts, infection by defective Rous sarcoma virus, 400
chloramphenicol, effect on ^{P}bacteriophage sensitivity, 50
chromosomal aberrations in kidney cells, virus-induced, 1174
circular deoxyribonucleic acid, 1135
classification of viruses, nucleic acid comparisons, 245
Clostridium tetani, bacteriophages from, 1085
complement-fixing antibody to adenovirus type 12 tumor antigens, 678
complement-fixing antigen of adenovirus type 9, 1101
coxsackievirus B3, HeLa cell receptors for, 693
cycloheximide, inhibition of reovirus ribonucleic acid synthesis by, 36
cytomegalovirus, obtained by glycine extraction or sonic disruption, 241
cytoplasmic fractions, in Semliki Forest virus ribonucleic acid replication, 374

density gradient centrifugation, virus purification by, 1207
deoxyribonuclease, interferon effect on induction, 466
deoxyribonucleic acid, adenovirus, uncoating of, 851
deoxyribonucleic acid, bacteriophage, infection of *Mycobacterium*, 448
deoxyribonucleic acid, from vaccinia virus, 643
deoxyribonucleic acid, in bacteriophage T4, 758
deoxyribonucleic acid, of adeno-associated satellite virus, 980
deoxyribonucleic acid, of bacteriophage χ, 591
deoxyribonucleic acid, of bacteriophage gh 1, 1274
deoxyribonucleic acid, of bacteriophage PBS 1, 841
deoxyribonucleic acid, of bacteriophage T4, 1193
deoxyribonucleic acid, of bovine papilloma virus, 1135
deoxyribonucleic acid, of virus from algae, 344
deoxyribonucleic acid, replication, function in bacteriophage infections, 86
deoxyribonucleic acid, replication in vaccinia virus, 16
deoxyribonucleic acid, synthesis in simian virus 40, 115
deoxyribonucleic acid, T1, properties of, 76
deoxyribonucleic acid, viral, relation of protein synthesis to, 110
deoxyribonucleic acid synthesis, induction by simian virus 40, 739
deoxyribonucleic acid synthesis, phage-directed, 779
diethylaminoethyl-dextran, effect on poliovirus ribonucleic acid, 891
dihydrofolate reductaseless mutant of bacteriophage T4, 963

electron microscopic studies, of parainfluenza virus, 215
electron microscopic studies, of rabies virus, 152
electron microscopic studies, of rubella virus, 205
embryo transformation, by adenovirus type 12, 362
encephalomyocarditis virus, effect of polycations on, 988
encephalomyocarditis virus, interaction with irradiated cells, 509
encephalomyocarditis virus, separation of variants, 308
encephalomyocarditis virus-cell union, 274
endotoxin-induced interferons, 883
enterovirus, concentration on membrane filters, 472
envelope protein of influenza virus, 920
enzyme synthesis, bacteriophage-induced, control of, 92
enzymes, induction in adenovirus-infected cells, 10
equine encephalomyelitis virus, in vitro properties, 453
equine encephalomyelitis virus, in vivo properties, 460
erythrocytes, agglutination by encephalomyocarditis virus, 274
Escherichia coli, acridine sensitivity of bacteriophage T2H, 543
Escherichia coli, *S*-adenosylmethionine-cleaving enzyme in, 57
Escherichia coli, bacteriophage T4-infected, 948
Escherichia coli, recombination-deficient, λ bacteriophage, 283
Escherichia coli, spheroplasts, T1 deoxyribonucleic acid infection, 76

ferritin-conjugated antibody, differentiation of viral components, 415
ferritin-labeled antibodies, study of simian virus 40, 384
fiber antigen, inhibition of adenovirus by, 747
fluorescent cell counting, assay for respiratory syncytial virus, 494
fluorodeoxyuridine, inhibition of virus reproduction by, 1150
5-fluorouracil, effect on interferon, 450
foot-and-mouth disease virus-infected cells, 1130
formaldehyde, stabilization of herpes simplex virus, 294

gene transcription, in bacteriophage T4, 569
genetic cellular resistance to avian leukosis-sarcoma virus, 898
glycine extraction, human cytomegalovirus from, 241
glycogen metabolism in HeLa cells, 1098
guanidine, effect on glycogen metabolism in HeLa cells, 1098

heat inactivation, stabilization of poliovirus by, 653
HeLa cell receptors, regeneration of, 693
HeLa cells, effect of viral infection, 626
hemagglutinin of adenovirus type 9, 1101
hemagglutinin synthesis, in virus-infected cells, 327
herpes simplex virus, effect on thymidine kinase, 238
herpes simplex virus, products in infections, 294
herpes simplex virus, ribonucleic acid synthesis, 583
herpes-type particles in Burkitt lymphoma cell line, 1045
herpes-type virus, replication in Burkitt cells, 1203
herpesvirus, antigens, 181
herpesvirus in tumor cells, 830
human cytomegalovirus, obtained by glycine extraction or sonic disruption, 241

immunofluorescence of Burkitt lymphoma cells, 1045
immunofluorescence of visna virus, 1265
infection with bacteriophage ϕX174, 135
infective virus substructure, vesicular stomatitis virus, 368
infectivity assay for MS2 ribonucleic acid, 711
influenza virus, envelope protein of, 920

influenza virus, large-scale purification, 1207
influenza virus, nucleic acid of, 1217
insect tissue cell cultures, yellow fever virus in, 1096
insect vector, plant-pathogenic virus, 430
insect vectors, wound tumor virus in, 1052
insects, virus particles in, 1028
interferon, effect of azauridine and fluorouracil, 450
interferon, effect on deoxyribonuclease induction, 466
interferon, induction in L cells, effect on Newcastle disease virus, 1
interferon, interference after removal of, 1158
interferon action on ribonucleic acid, 1168
interferon production by *Salmonella typhimurium* mutants, 1164
interferons, in rabbits, 883
intrinsic interference, by viruses, 334
5-iodo-2′-deoxyuridine-treated vaccinia virus, 1037
isopycnic banding of virus particles, 659
isopycnic centrifugation, separation of viral inclusion bodies, 646

kidney cells, virus-induced chromosomal aberrations, 1174

L cells, changes of Newcastle disease virus in, 1
L cells, reovirus directed ribonucleic acid synthesis in, 24
lambda bacteriophage, in recombination-deficient *Escherichia coli*, 283
lambda bacteriophage, proteins of, 928
leukocytes as host for vesicular stomatitis virus, 1139
loci controlling resistance to avian leukosis-sarcoma virus, 898
lymphocytic choriomeningitis virus, assay for, 1091
lymphocytic choriomeningitis virus, plaquing system for, 1224
lytic enzyme, bacteriophage, properties, 617
lytic enzyme in *Micrococcus lysodeikticus*, 701

magnesium, effect on rhinovirus replication, 489
maturation process, T-even bacteriophage, 193
membrane filters, enterovirus concentration on, 472
L-methylisatin 3-thiosemicarbazone, metabolic removal of sulfur from, 650
Micrococcus lysodiekticus, phage infection of, 701
monkey cell-adapting component in adenovirus, 876
monkey kidney cells, rubella virus infection, 205
monocyte as host for vesicular stomatitis virus, 1139
morphogenesis of avian infectious bronchitis virus, 1019
morphogenesis of type 2 parainfluenza virus, 215
morphology of rabies virus, 152
motile bacteria, bacteriophage χ attack mechanisms, 599
multiplicity reactivation of vaccinia virus, 45
multitailed T2 bacteriophage, 1087
mumps virus, morphogenesis, 415
murine C-type virus, 1238
mutants, bacteriophage T4, dihydrofolate reductase-less, 963
mutants, *Salmonella typhimurium*, interferon production by, 1164
mutants, Sindbis virus, temperature-sensitive, 956
mycobacteriophage B1, deoxyribonucleic acid, infection of *Mycobacterium*, 448
Mycobacterium tuberculosis, infection with bacteriophage deoxyribonucleic acid, 448
mycoplasmas, assay for, 1227
myxovirus neuraminidase, synthesis, 327

Neisseria meningitidis, bacteriophages, 538
nervous system, plant virus in vector, 430
neuraminidase, myxovirus, synthesis, 327
Newcastle disease virus, changes after passage in tissue culture, 1
nitrogen mustard, inactivation of vaccinia virus by, 45
nucleic acid, bacteriophage, replication of, 64
nucleic acid, synthesis, relation of protein synthesis to, 110
nucleic acids, virus, classification of, 245
nucleic acid of adeno-associated satellite virus type 4, 980
nucleic acid of influenza virus, 1217

parainfluenza virus, type 2, morphogenesis, 215
Peregrinus maidis, virus particles in, 1028
photodynamic mutants, of bacteriophage T4, 260
plant virus, in vector nervous system, 430
plaque assay for lymphocytic choriomeningitis virus, 1091
plaquing system for ribonucleic acid viruses, 1224
poliovirus, effect of 2-thiouracil, 653
poliovirus, effect on glycogen metabolism in HeLa cells, 1098
poliovirus ribonucleic acid, infectivity of, 891
poliovirus T1, HeLa cell receptors for, 693
polyamines, effect on bacteriophage T4 morphogenesis, 559
polycations, effect on encephalomyocarditis virus in mice, 988
polyions, effect on rabies virus infectivity, 145
polymerase, ribonucleic acid, presence in virus-infected cells, 97
polyoma virus, infection of hamster embryo cells with, 905
polyoma virus, transformation, effect of protein synthesis on, 120
primary virus-cell interactions, 317
protein components of lambda bacteriophages, 928
protein of influenza virus envelope, 920
protein synthesis, effect on polyoma transformation, 120
protein synthesis, in adenovirus-infected cells, 843
protein synthesis, in vaccinia virus, 16
protein synthesis, relation to viral deoxyribonucleic acid synthesis, 110
proteins, virus structural, time course of synthesis, 500
proteins of adenoviruses, 723
Pseudomonas putida, bacteriophage of, 1274
psoralen, mutant induction in presence, 260
puromycin, effect on interferon activity, 1158
putrescine, gene transcription in bacteriophage T4 by, 569

Qβ-replicase reaction, 771
quantitative measurements of virus particles, 1074

rabies virus, in tissue culture, 152
rabies virus, infectivity, effect of polyions on, 145
rabies virus, plaquing system for, 1224

radiation effects, on viral infection, 509
reovirus, inhibition of ribonucleic acid synthesis in, 36
reovirus-directed ribonucleic acid synthesis, 24
reovirus ribonucleic acid, properties, 302
reovirus ribonucleic acid, structural units of, 665
replication, herpesvirus antigens during, 181
replication, of bacteriophage ribonucleic acid, 514, 523
replication, of reticuloendotheliosis virus, 1117
respiratory syncytial virus, fluorescent cell counting assay, 494
respiratory syncytial virus, isolation, 659
respiratory virus, new, 810
reticuloendotheliosis virus, replication, 1117
rhinovirus, magnesium effect on growth, 489
ribonucleic acid, bacteriophage, replication of, 64, 514, 523
ribonucleic acid, messenger, vaccinia virus, 550
ribonucleic acid, of bacteriophage MS2, 711
ribonucleic acid, poliovirus, infectivity of, 891
ribonucleic acid, renaturation of, 793, 804
ribonucleic acid, reovirus, properties, 302
ribonucleic acid, reovirus, structural units of, 665
ribonucleic acid, replication in Semliki Forest virus, cytoplasmic fractions, 374
ribonucleic acid, Semliki Forest virus, 1168
ribonucleic acid, virus-specific synthesis, 583
ribonucleic acid polymerase, presence in virus-infected cells, 97
ribonucleic acid polymerase formation, effect of actinomycin D on, 1130
ribonucleic acid replication, 771
ribonucleic acid synthesis, reovirus, inhibition of, 36
ribonucleic acid synthesis, reovirus-directed, 24
ribonucleic acid virus from respiratory tract, 810
ribonucleic acid viruses, localization of, 1271
ribonucleic acid viruses, plaquing system for, 1224
ribosomal ribonucleates, effect of bacteriophage R17 on, 529
Rous sarcoma cells, nonproducing state of, 729
Rous sarcoma virus, defective, infection of chick fibroblasts, 400
Rous sarcoma virus in Japanese quail, 1122
rubella virus, electron microscopy of, 205
rubella virus replication in mouse brains, 1089

Salmonella typhimurium mutants, interferon production by, 1164
satellite virus, defective, assay and growth, 171
Semliki Forest virus, cytoplasmic fractions in ribonucleic acid replication, 374
Semliki Forest virus, in HEp-2 cell cultures, 996
Semliki Forest virus, ribonucleic acid, 1168
Semliki Forest virus, ribonucleic acid polymerase, 97
Serratia marcescens, infection by bacteriophage χ, 445
sex-related resistance to adenovirus-12 oncogenesis, 1186
simian adenovirus SV15, effect on human adenoviruses, 830
simian virus 40, deoxyribonucleic acid synthesis in, 115
simian virus 40, effect on cellular deoxyribonucleic acid synthesis, 739
simian virus 40, effect on thymidine kinase production, 912
simian virus 40, study with ferritin-labeled antibiotics, 384
simian virus 40, transformation of, 115
simian virus 40-induced hamster tumors, 1093
simian virus 40-induced tumor antigen, 684
simian virus 40-resistant hamster cells, transformation, 1109
simian virus 40-transformed mouse kidney cells, 968
Sindbis virus, temperature-sensitive mutants, 956
sonic disruption, human cytomegalovirus from, 241
spheroplasts, *Escherichia coli*, T1 deoxyribonucleic acid infection, 76
sporulation of bacteriophage-infected cells, 935
strand length of vaccinia virus deoxyribonucleic acid, 1037
streptococci, group A, bacteriophage resistance in, 50
sulfur, metabolic removal from 1-methylisatin 3-thiosemicarbazone, 650
synchronized cells, vaccinia infection of, 1255

T antigen from simian virus 40-induced tumors, 1093
T-even bacteriophage, induced structural defects, 193
T1 deoxyribonucleic acid, properties of, 76
T2 bacteriophage, multitailed, 1087
T3 infection, in *Escherichia coli*, enzyme production, 57
temperature-sensitive mutants of phage α, 717
temperature-sensitive Sindbis virus mutants, 956
temperature-sensitive Venezuelan equine encephalitis virus, 128
thermophilic bacteriophage lytic enzyme, 617
thiopyronin, mutant induction in presence, 260
2-thiouracil, effect on poliovirus, 653
thymidine kinase, herpes simplex virus effect on, 238
thymidine kinase, induction in adenovirus-infected cells, 10
thymidine kinase from normal and infected cells, 912
tissue cultures, separation of mycoplasmas from, 1227
transformation, effect of protein synthesis on, 120
transformation of simian virus 40-resistant hamster cells, 1109
transmission of Rous sarcoma virus, 729
transplant antigen production by polyoma strains, 905
tumor antigen, antibody to, 678
tumor antigen, simian virus 40-induced, 684
tumor cell lines, polyoma virus-induced, 905
tumor cells, comparative study, 830
tumor induction, inhibition by $PB2_1$, bacteriophage, 268
tumor response to adenovirus-12 in hamsters, 1186
tumors, T antigen from, 1093

ultrastructure of adenovirus-infected KB cells, 817

vaccinia-infected mammalian cells, soluble antigens, 500
vaccinia infection of synchronized cells, 1255
vaccinia virus, deoxyribonucleic acid from, 1037
vaccinia virus, morphology of deoxyribonucleic acid from, 643
vaccinia virus, multiplicity reactivation of, 45
vaccinia virus, properties of messenger ribonucleic acid, 550
vaccinia virus, proteins, formation of, 16
Venezuelan equine encephalomyelitis virus, in vitro properties, 453

Venezuelan equine encephalomyelitis virus, in vivo properties, 460
Venezuelan equine encephalomyelitis virus, primary cell interactions, 317
Venezuelan equine encephalitis virus, temperature sensitivity, 128
vesicular stomatitis virus, infective substructure, 368
vesicular stomatitis virus, monocyte as host for, 1139
viral carcinogenesis, machanism, 576
viral functions of bacteriophage α, 717
viral inclusion bodies, separation by isopycnic centrifugation, 646
viral infection, effect on HeLa cells, 626
viral infection, radiation effects, 509
virogenic simian virus 40-transformed mouse cells, 968
virus fraction, non-neutralizable persistent, 478
virus-induced interferons, 883
virus particles, from Burkitt lymphoma cell line, 640
virus particles, measurement in crude preparations, 1074
virus particles in *Peregrinus maidis*, 1028
virus pools, separation of mycoplasmas from, 1227
virus-specific ribonucleic acid synthesis, 583
viruses, blue-green algae, deoxyribonucleic acid, 344
viruses, intrinsic interference, 334
visna virus, immunofluorescence of, 1265

wound tumor virus in insect vectors, 1052

yellow fever virus, multiplication in cultures, 1096

INDEX TO DATE OF ISSUE

Month	Date of Issue	Pages
February	2/18/67	1–244
April	4/17/67	245–452
June	6/19/67	453–652
August	8/29/67	653–842
October	10/27/67	843–1100
December	12/22/67	1101–1284

Statement of Ownership, Management and Circulation required by the Act of October 23, 1962; Section 4369, Title 39, United States Code.

1. *Date of Filing:* 29 September 1967.
2. *Title of Publication:* Journal of Virology
3. *Frequency of Issue:* Bimonthly
4. *Location of known Office of Publication:* Mount Royal and Guilford Aves., Baltimore, Maryland 21202
5. *Location of the Headquarters or General Business Offices of Publisher:* 115 Huron View Blvd., Ann Arbor, Michigan 48103
6. *Publisher:* American Society for Microbiology, 115 Huron View Blvd., Ann Arbor, Michigan 48103

Editor: Robert R. Wagner, School of Medicine, University of Virginia, Charlottesville, Va. 22901

Managing Editor: Robert A. Day, 4011 Rickover Road, Silver Spring, Md. 20902

7. *Owners:* (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual, must be given.) American Society for Microbiology, 115 Huron View Blvd., Ann Arbor, Michigan 48103.

8. *Known bondholders, mortgagees, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages or other securities are:* None

9. For completion by nonprofit organizations authorized to mail at special rates (*section 132.122, Postal Manual*): The purpose, function, and nonprofit status of this organization and the exempt status for Federal income tax purposes *have not changed during preceding 12 months.*

	(a)*	(b)†
10. A. Total No. Copies Printed (Net Press Run)	4548	5110
B. Paid Circulation		
1. Sales Through Dealers and Carriers, Street Vendors and Counter Sales	none	none
2. Mail Subscriptions	3286	3886
C. Total Paid Circulation	3286	3886
D. Free Distribution (including samples) By Mail, Carrier or Other Means	17	21
E. Total Distribution (sum of C and D)	3303	3907
F. Office Use, Left-Over, Unaccounted Spoiled After Printing	1245	1203
G. Total (Sum of E & F—should equal net press run shown in A)	4548	5110

* Average number of copies for each issue during preceding 12 months.

† Single issue nearest to filing date.

‡ I certify that the statements made by me above are correct and complete. (Signed) Robert A. Day, Managing Editor.

CONTENTS

No. 1, FEBRUARY 1967

Animal Viruses

Studies on Persistent Infections of Tissue Culture. VI. Reversible Changes in Newcastle Disease Virus Populations as a Result of Passage in L Cells or Chick Embryos. José E. Rodriquez, Volker ter Meulen, and Werner Henle 1
Enzyme Induction in Green Monkey Kidney Cultures Infected with Simian Adenovirus. Saul Kit, Lech J. Piekarski, Del R. Dubbs, Ramon A. de Torres, and Milton Anken .. 10
Sequential Formation of Vaccinia Virus Proteins and Viral Deoxyribonucleic Acid. N. P. Salzman and E. D. Sebring 16
Reovirus-directed Ribonucleic Acid Synthesis in Infected L Cells. A. J. Shatkin and B. Rada .. 24
Selective Inhibition of Reovirus Ribonucleic Acid Synthesis by Cycloheximide. Y. Watanabe, H. Kudo, and A. F. Graham 36
Multiplicity Reactivation of Vaccinia Virus Particles Treated with Nitrogen Mustard. K. S. Kim and D. G. Sharp 45
Ribonucleic Acid Polymerase Synthesis of Double-stranded Arbovirus Ribonucleic Acid. E. M. Martin and J. A. Sonnabend 97
Relationship Between Protein Synthesis and Viral Deoxyribonucleic Acid Synthesis. J. R. Kates and B. R. McAuslan 110
Simian Virus 40 Transformation and the Period of Cellular Deoxyribonucleic Acid Synthesis. George J. Todaro and Howard Green 115
Effect of the Inhibition of Protein Synthesis on the Establishment of Transformation by Polyoma Virus. Guglielmo Marin and Claudio Basilico 120
Temperature-sensitive Steps in the Biosynthesis of Venezuelan Equine Encephalitis Virus. Eugene Zebovitz and Arthur Brown 128
Effect of Polyions on the Infectivity of Rabies Virus in Tissue Culture: Construction of a Single Cycle Growth Curve. T. J. Wiktor, M. M. Kaplan, R. F. Maes, J. B. Campbell, and H. Koprowski 145
Structure and Development of Rabies Virus in Tissue Culture. Klaus Hummeler, Hilary Koprowski, and Tadeusz J. Wiktor 152
Physical Assay and Growth Cycle Studies of a Defective Adeno-Satellite Virus. Wade P. Parks, Joseph L. Melnick, Robert Rongey, and Heather D. Mayor 171
Cellular Compartmentalization of Herpesvirus Antigens During Viral Replication. Bernard Roizman, Susan B. Spring, and Philip R. Roane, Jr. 181
Electron Microscopy of Monkey Kidney Cell Cultures Infected with Rubella Virus. Kenneth S. W. Kim and Edwin S. Boatman 205
Morphogenesis of Type 2 Parainfluenza Virus Examined by Light and Electron Microscopy. C. Howe, C. Morgan, C. de Vaux St. Cyr, K. C. Hsu, and H. M. Rose 215
Altered Properties of Thymidine Kinase After Infection of Mouse Fibroblast Cells with Herpes Simplex Virus. Saul Kit, Del R. Dubbs, and Milton Anken 238
Comparison of Human Cytomegalovirus Obtained by Glycine Extraction and by Sonic Disruption of Infected Cells. F. Probstmeyer, M. Benyesh-Melnick, and R. M. McCombs 241

Bacterial Viruses

Effect of Resistance to Chloramphenicol on Bacteriophage Sensitivity of Group A Streptococci. Patric L. Friend and Hutton D. Slade 50
Synthesis of an *S*-Adenosylmethionine-cleaving Enzyme in T3-infected *Escherichia coli* and Its Disturbance by Co-infection with Enzymatically Incompetent Bacteriophage. Rudolf Hausmann 57
Replication of Bacteriophage Ribonucleic Acid: Some Physical Properties of Single-Stranded, Double-Stranded, and Branched Viral Ribonucleic Acid. Richard M. Franklin 64
Properties of Infectious T1 Deoxyribonucleic Acid. Edward N. Brody, Roy P. Mackal, and E. A. Evans, Jr. 76

Deoxyribonucleic Acid Replication and Expression of Early and Late Bacteriophage Functions in *Bacillus subtilis*. Jacques J. Pène and Julius Marmur 86
Control of Bacteriophage-induced Enzyme Synthesis in Cells Infected with a Temperature-sensitive Mutant. Christopher K. Mathews and Richard H. Kessin 92
The Process of Infection with Bacteriophage ϕX174. XIII. Evidence for an Essential Bacterial "Site." Michael J. Yarus and Robert L. Sinsheimer 135
Induced Structural Defects in T-Even Bacteriophage. Donald J. Cummings, V. A. Chapman, S. S. De Long, and L. Mondale 193

No. 2, April 1967

Animal Viruses

Distribution of Cell Receptors and Simple Sugar Inhibitors during Encephalomyocarditis Virus-Cell Union. Calvin M. Kunin 274
Herpes Simplex Virus Products in Productive and Abortive Infection. I. Stabilization with Formaldehyde and Preliminary Analyses by Isopycnic Centrifugation in CsCl. Susan B. Spring and Bernard Roizman 294
Purification and Properties of Reovirus Ribonucleic Acid. W. J. Iglewski and R. M. Franklin 302
Separation of Plaque-type Variants of Encephalomyocarditis Virus by Chromatography on Calcium Phosphate. A. T. H. Burness 308
Primary Virus-Cell Interactions in the Immunofluorescence Assay of Venezuelan Equine Encephalomyelitis Virus. Nicholas Hahon and Kenneth O. Cooke 317
Intracellular Synthesis of Myxovirus Neuraminidase in Chick Embryo Cell Monolayer Culture. I. Neuraminidase Activity, Hemagglutinin Synthesis, and Content of Cell-bound Sialic Acid in Newcastle Disease Virus-infected Cells. Mikhail A. Lipkind and Inna V. Tsvetkova 327
Intrinsic Interference: a New Type of Viral Interference. Philip I. Marcus and David H. Carver 334
Adenovirus Type 12-Rat Embryo Transformation System. Aaron E. Freeman, Paul H. Black, Ronald Wolford, and Robert J. Huebner 362
Infective Virus Substructure from Vesicular Stomatitis Virus. F. Brown, B. Cartwright, Joan Crick, and C. J. Smale 368
Cytoplasmic Fractions Associated with Semliki Forest Virus Ribonucleic Acid Replication. Robert M. Friedman and Irene K. Berezesky 374
Electron Microscopic Study of the Development of Simian Virus 40 by Use of Ferritin-labeled Antibodies. Lyndon S. Oshiro, Harry M. Rose, Councilman Morgan, and Konrad C. Hsu 384
Electron Microscopy of Chick Fibroblasts Infected by Defective Rous Sarcoma Virus and Its Helper. Doris Courington and Peter K. Vogt 400
Immuno-Electron Microscopy of the Morphogenesis of Mumps Virus. Huu Duc-Nguyen and Edith N. Rosenblum 415
Effects of 5-Fluorouracil and 6-Azauridine on Interferon Action. F. Richard Nichol and Daniel R. Tershak 450

Bacterial Viruses

Properties of *r* Mutants of Bacteriophage T4 Photodynamically Induced in the Presence of Thipyronin and Psoralen. John W. Drake and Janice McGuire 260
Agrobacterium tumefaciens Conn. IV. Bacteriophage PB2$_1$ and Its Inhibitory Effect on Tumor Induction. Tom Stonier, James McSharry, and Thomas Speitel 268
Behavior of λ Bacteriophage in a Recombination-deficient Strain of *Escherichia coli*. Katherine Brooks and Alvin J. Clark 283
Morphology of a Virus of Blue-green Algae and Properties of Its Deoxyribonucleic Acid. Ronald Luftig and Robert Haselkorn 344
Infection of *Serratia marcescens* by Bacteriophage χ. Tetsuo Iino and Michiko Mitani 445
Infection of *Mycobacterium tuberculosis* with Deoxyribonucleic Acid Extracted from Mycobacteriophage B1. Tohru Tokunaga and Reiko M. Nakamura 448

Plant Viruses and General

Preliminary Classification of Viruses Based on Quantitative Comparisons of Viral Nucleic Acids. A. J. D. Bellett 245
Electron Microscopy of a Plant-pathogenic Virus in the Nervous System of Its Insect Vector. Hiroyuki Hirumi, Robert R. Granados, and Karl Maramorosch 430

No. 3, JUNE 1967

Animal Viruses

Properties of Venezuelan Equine Encephalomyelitis Virus Accompanying Attenuation In Vitro. Henry J. Hearn, Jr., and William T. Soper 453
Properties of Venezuelan Equine Encephalomyelitis Virus Grown In Vivo. William T. Soper and Henry J. Hearn, Jr. 460
Effect of Interferon Deoxyribonuclease Induction in Chick Fibroblast Cultures Infected with Cowpox Virus. G. Bodo and C. Jungwirth 466
Concentration of Enteroviruses on Membrane Filters. Craig Wallis and Joseph L. Melnick.. 472
Virus Aggregation as the Cause of the Non-neutralizable Persistent Fraction. Craig Wallis and Joseph L. Melnick 478
Effect of Magnesium on Replication of Rhinovirus HGP. Milan Fiala and George E. Kenny.. 489
Fluorescent Cell Counting as an Assay Method for Respiratory Syncytial Virus. Jack H. Schieble, Alice Kase, and Edwin H. Lennette 494
Soluble Antigens of Vaccinia-infected Mammalian Cells. II. Time Course of Synthesis of Soluble Antigens and Virus Structural Proteins. Wesley C. Wilcox and Gary H. Cohen.. 500
Interaction of Encephalomyocarditis Virus with Ultraviolet-irradiated Host Cells. P. C. Balduzzi 509
Metabolic Properties of Early and Late Vaccinia Virus Messenger Ribonucleic Acid. E. D. Sebring and N. P. Salzman 550
Mechanism of Viral Carcinogenesis by Deoxyribonucleic Acid Mammalian Viruses. IV. Related Virus-specific Ribonucleic Acids in Tumor Cells Induced by "Highly" Oncogenic Adenovirus Types 12, 18, and 31. Kei Fujinaga and Maurice Green 576
Virus-specific Ribonucleic Acid Synthesis in KB Cells Infected with Herpes Simplex Virus. John F. Flanagan 583
Virological, Immunochemical, and Cytochemical Studies of Four HeLa Cell Lines Infected with Two Strains of Influenza Virus. Volker Ter Meulen and Robert Love 626
Structure of Virus Particles Extracted from a Burkitt Lymphoma Cell Line. Junji Yamaguchi, Yorio Hinuma, and James T. Grace, Jr. 640
Morphology of Deoxyribonucleic Acid Extracted from Cores of Vaccinia Virus. K. B. Easterbrook 643
Separation of Two Types of Viral Inclusion Bodies by Isopycnic Centrifugation. Mauro E. Martignoni 646
Replication of an Adeno-associated Virus in Canine and Human Cells with Infectious Canine Hepatitis Virus as a "Helper." Kendall O. Smith and Warren D. Gehle 648
Metabolic Removal of Sulfur from 1-Methylisatin 3-Thiosemicarbazone. L. A. Nutting, E. M. Weber, and J. L. Tryon 650

Bacterial Viruses

Replication of Bacteriophage Ribonucleic Acid: Some Properties of Native and Denatured Replicative Intermediate. Richard M. Franklin 514
Structure and Function of Bacteriophage R17 Replicative Intermediate Ribonucleic Acid. I. Properties of the Parental Labeled Molecule. R. L. Erikson and E. Erikson 523
Effect of Bacteriophage R17 Infection on Host-directed Synthesis of Ribosomal Ribonucleates. James B. Hudson and William Paranchych 529
Isolation of Bacteriophages Active Against *Neisseria meningitidis*. Sylvia G. Cary and Donald H. Hunter 538
Acridine Sensitivity of Bacteriophage T2H in *Escherichia coli*. Anita Y. Hessler, Martha Barnes Baylor, and Judith P. Baird 543
Differential Effect of Polyamines on T4 Morphogenesis. Channa Shalitin and Sara Sarid 559
Selective Gene Transcription in Bacteriophage T4 by Putrescine. Channa Shalitin 569

Purification and Chemistry of Bacteriophage χ. Sylvia Z. Schade and Julius Adler 591
How Bacteriophage χ Attacks Motile Bacteria. Sylvia Z. Schade, Julius Adler, and Hans Ris 599
Characteristics of Tφ3, a Bacteriophage for *Bacillus stearothermophilus*. Larre N. Egbert and Herschel K. Mitchell 610
Purification and Properties of a Thermophilic Bacteriophage Lytic Enzyme. N. E. Welker 617

No. 4, AUGUST 1967

Animal Viruses

Inactivation and Heat Stabilization of Poliovirus by 2-Thiouracil. Frances M. Steele and Francis L. Black 653
Respiratory Syncytial Virus Isolation by Combined Continuous Flow-Isopycnic Banding Centrifugation. G. B. Cline, Helen Coates, N. G. Anderson, R. M. Chanock, and W. W. Harris 659
Structural Units of Reovirus Ribonucleic Acid and Their Possible Functional Significance. Y. Watanabe and A. F. Graham 665
Nature of Hamster Complement-fixing Antibody to Adenovirus 12 Tumor Antigen. Ruth A. Fugmann and M. Michael Sigel 678
Nonidentity of Some Simian Virus 40-induced Enzymes with Tumor Antigen. Saul Kit, Joseph L. Melnick, Milton Anken, Del Rose Dubbs, R. A. de Torres, and Tsunehiro Kitahara 684
Comparative Studies of the Regeneration of HeLa Cell Receptors for Poliovirus T1 and Coxsackievirus B3. Neil H. Levitt and Richard L. Crowell 693
Adenovirus Proteins. II. N-Terminal Amino Acid Analysis. William G. Laver, J. Robert Suriano, and Maurice Green 723
Nonproducing State of Rous Sarcoma Cells: Its Contagiousness in Chicken Cell Cultures. Peter K. Vogt 729
Induction of Cellular Deoxyribonucleic Acid Synthesis by Simian Virus 40. Saul Kit, Ramon A. De Torres, Del R. Dubbs, and Maria L. Salvi 738
Mechanism by Which Fiber Antigen Inhibits Multiplication of Type 5 Adenovirus. A. J. Levine and H. S. Ginsberg 747
Growth and Intracellular Development of a New Respiratory Virus. Dorothy Hamre, David A. Kindig, and Judith Mann 810
Electron Microscopy of Adenovirus 12 Replication. I. Fine Structural Changes in the Nucleus of Infected KB Cells. A. Martinez-Palomo, J. Le Buis, and W. Bernhard 817
Comparative Study of Cultured Burkitt Tumor Cells by Immunofluorescence, Autoradiography, and Electron Microscopy. Harald zur Hausen, Werner Henle, Klaus Hummeler, Volker Diehl, and Gertrude Henle 830
Enhancement of the Replication of Human Adenoviruses in Simian Cells by Simian Adenovirus SV15. Robert F. Naegele and Fred Rapp 838

Bacterial Viruses

Characteristics of a Lytic Enzyme Induced by Bacteriophage Infection of *Micrococcus lysodeikticus*. J. M. Goepfert and H. B. Naylor 701
Characterization of an Infectivity Assay for the Ribonucleic Acid of Bacteriophage MS2. James H. Strauss, Jr., and Robert L. Sinsheimer 711
Chronology of Viral Functions in Bacteriophage α. F. S. Gaeta, P. Donini, L. Veneziani-Brizi, and F. Graziosi 717
Molecular Recombination in T4 Bacteriophage Deoxyribonucleic Acid. I. Tertiary Structure of Early Replicative and Recombining Deoxyribonucleic Acid. Andrzej W. Kozinski, P. B. Kozinski, and R. James 758
Examination of the Qβ-Replicase Reaction by Sucrose Gradient and Gel Electrophoresis. N. R. Pace, D. H. L. Bishop, and S. Spiegelman 771
Amber Mutants of Bacteriophages T3 and T7 Defective in Phage-directed Deoxyribonucleic Acid Synthesis. R. Hausmann and Beatriz Gomez 779
Denaturation and Renaturation of Viral Ribonucleic Acid. I. Annealing R17 Ribonucleic Acid with Denatured Replicative Form or with Denatured Replicative Intermediate. Wallace J. Iglewski and Richard M. Franklin 793

Denaturation and Renaturation of Viral Ribonucleic Acid. II. Characterization of the Products Resulting from Annealing R17 Ribonucleic Acid with Denatured Replicative Intermediate. Wallace J. Iglewski and Richard M. Franklin 804
Molecular Weight of Bacteriophage PBS 1 Deoxyribonucleic Acid. B. I. Hunter, H. Yamagishi, and I. Takahashi 841

No. 5, October 1967

Animal Viruses

Inhibition of Host Protein Synthesis in Type 5 Adenovirus-infected Cells. Leonard J. Bello and Harold S. Ginsberg 843
Intracellular Uncoating of Type 5 Adenovirus Deoxyribonucleic Acid. William C. Lawrence and Harold S. Ginsberg 851
Attachment and Eclipse of Adenovirus. Lennart Philipson 868
Characterization of the Strain of Adenovirus Type 7 Carrying the Defective Monkey Cell-adapting Component. Janet S. Butel 876
Characterization of Virus- and Endotoxin-induced Interferons Obtained from the Serum and Urine of Rabbits. Yang H. Ke and Monto Ho 883
Factors Influencing the Enhancement of the Infectivity of Poliovirus Ribonucleic Acid by Diethylaminoethyl-Dextran. Joseph S. Pagano, James H. McCutchan, and Antti Vaheri 891
Two Loci Controlling Genetic Cellular Resistance to Avian Leukosis-Sarcoma Viruses. Lyman B. Crittenden, Howard A. Stone, Richard H. Reamer, and William Okazaki 898
Analysis of Hamster Tumor Cell Lines Isolated from Single Colonies Soon After Induction by Polyoma Strains Differing in Transplant Antigen Production. J. Donald Hare 905
Thymidine Kinase from Normal, Simian Virus 40-Transformed and Simian Virus 40-Lytically Infected Cells. Richard I. Carp 912
Envelope Protein of Influenza Virus. I. Hemagglutinating Activity of Reassociated Subunits. Edward A. Eckert 920
Temperature-sensitive Mutants of Sindbis Virus: Biochemical Correlates of Complementation. Boyce W. Burge and E. R. Pfefferkorn 956
Virogenic Properties of Bromodeoxyuridine-sensitive and Bromodeoxyuridine-resistant Simian Virus 40-transformed Mouse Kidney Cells. Del R. Dubbs, Saul Kit, Ramon A. de Torres, and Milton Anken 968
Physiochemical Characterization of Adeno-associated Satellite Virus Type 4 and Its Nucleic Acid. Wade P. Parks, Maurice Green, Magdalena Piña, and Joseph L. Melnick 980
Effect of Polycations on Growth and Dissemination of the Encephalomyocarditis Virus in Mice. John E. Craighead 988
Semliki Forest Virus in HEp-2 Cell Cultures. Robert A. Erlandson, Virginia I. Babcock, Chester M. Southam, Roller B. Bailey, and Frederick H. Shipkey 996
Electron Microscopy of Adenovirus 12 Replication. II. High-Resolution Autoradiography of Infected KB Cells Labeled with Tritiated Thymidine. A. Martinez-Palomo and N. Granboulan 1010
Morphogenesis of Avian Infectious Bronchitis Virus and a Related Human Virus (Strain 229E). Walter B. Becker, Kenneth McIntosh, Jane H. Dees, and Robert M. Chanock 1019
Strand-Length Measurements of Normal and 5-Iodo-2′-Deoxyuridine-treated Vaccinia Virus Deoxyribonucleic Acid Released by the Kleinschmidt Method. J. F. McCrea and Muriel B. Lipman 1037
Immunofluorescence and Herpes-Type Virus Particles in the P3HR-1 Burkitt Lymphoma Cell Line. Yorio Hinuma, Mitsuru Konn, Junji Yamaguchi, Donald J. Wudarski, James R. Blakeslee, Jr., and James T. Grace, Jr. 1045
Massive Direct Conversion of Chick Embryo Cells by Strain MC29 Avian Leukosis Virus. A. J. Langlois, Saraswathi Sankaran, Pe-Hwa L. Hsiung, and J. W. Beard 1082
Rubella Virus Replication in the Brains of Suckling Mice. David H. Carver, Dexter S. Y. Seto, Philip I. Marcus, and Louis Rodrigues 1089
Plaque Assay for Lymphocytic Choriomeningitis Virus Based on Hemadsorption Interference. Sally Wainwright and C. A. Mims 1091

Purification of T Antigen from Nuclei of Simian Virus 40-induced Hamster Tumors. Harrison M. Lazarus, Michael B. Sporn, Joseph M. Smith, and William R. Henderson... 1093
Multiplication of Yellow Fever Virus in Insect Tissue Cell Cultures. John L. Converse and Stanley C. Nagle, Jr.... 1096
Effects of Poliovirus and of Guanidine on the Metabolism of Glycogen in Hela Cells. I. L. Graves... 1098

Bacterial Viruses

Protein Components of Bacteriophages λ and λ Virulent. M. Villarejo, S. Hua, and E. A. Evans, Jr.... 928
Differential Expression of Bacteriophage Genomes in Vegetative and Sporulating Cells of *Bacillus subtilis*. Clifford O. Yehle and Roy H. Doi... 935
Lysis Inhibition in *Escherichia coli* Infected with Bacteriophage T4. Werner Bode... 948
Growth of a Dihydrofolate Reductaseless Mutant of Bacteriophage T4. Christopher K. Mathews... 963
Detection of Bacteriophages from Two Strains of *Clostridium tetani*. Lawrence M. Prescott and Robert A. Altenbern... 1085
Multitailed T2 Bacteriophage. C. J. Pfau and S. C. Holt... 1087

Plant and Insect Viruses

Virus Particles in Apparently Healthy *Peregrinus maidis*. F. Herold and K. Munz... 1028
Electron Microscopy of the Formation of Wound Tumor Virus in Abdominally Inoculated Insect Vectors. Eishiro Shikata and Karl Maramorosch... 1052
A New Procedure for Quantitative Measurements of Virus Particles in Crude Preparations. K. Strohmaier... 1074

No. 6, DECEMBER 1967

Animal Viruses

Separation and Characterization of Soluble Adenovirus Type 9 Components. E. Norrby, B. Nyberg, P. Skaaret, and A. Lengyel... 1101
Transformation of Simian Virus 40-resistant Hamster Cells with an Adenovirus 7-Simian Virus 40 Hybrid. Leila Diamond... 1109
Replication of the Reticuloendotheliosis Virus (Strain T) in Chicken Embryo Cell Culture. Henry R. Bose, Jr., and Alvin S. Levine... 1117
Growth Curve and Distribution of Rous Sarcoma Virus (Bryan) in Japanese Quail. Roman J. Pienta and Vincent Groupé... 1122
Effect of Actinomycin D on Virus-induced Ribonucleic Acid Polymerase Formation in Foot-and-Mouth Disease Virus-infected Baby Hamster Kidney Cells. Jerome Polatnick and Ralph B. Arlinghaus... 1130
Studies on Circular Deoxyribonucleic Acid. I. Isolation of Bovine Papilloma Virus and Characterization of Its Deoxyribonucleic Acid. H. Bujard... 1135
Specific Role of Each Human Leukocyte Type in Viral Infections. I. Monocyte as the Host Cell for Vesicular Stomatitis Virus Replication In Vitro. Robert Edelman and E. Frederick Wheelock... 1139
Transient Inhibition of Avian Myeloblastosis Virus Reproduction by Amethopterin and Fluorodeoxyuridine. A. G. Knudson, Jr., Anna M. Brodetsky, and M. A. Baluda... 1150
Analysis of Additional Interference Occurring after the Removal of Interferon. Royce Z. Lockart, Jr.... 1158
Interferon Production in Mice by Cell Wall Mutants of *Salmonella typhimurium*. Julius S. Youngner and David S. Feingold... 1164
Interferon Action on Parental Semliki Forest Virus Ribonucleic Acid. Robert M. Friedman, Karl H. Fantes, Hilton B. Levy, and William B. Carter... 1168
Induction of Specific Chromosomal Aberrations by Adenovirus Type 12 in Human Embryonic Kidney Cells. Harald zur Hausen... 1174
Sex-related Resistance in Hamsters to Adenovirus-12 Oncogenesis. II. Influence of Virus Dose. David S. Yohn, Clare A. Funk, and James T. Grace, Jr.... 1186

Replication of Herpes-Type Virus in a Burkitt Lymphoma Cell Line. Yorio Hinuma, Mitsuru Konn, Junji Yamaguchi, and James T. Grace, Jr. ... 1203
Purification of Large Quantities of Influenza Virus by Density Gradient Centrifugation. C. B. Reimer, R. S. Baker, R. M. vanFrank, T. E. Newlin, G. B. Cline, and N. G. Anderson ... 1207
Isolation and Partial Characterization of Nucleic Acid of Influenza Virus. D. P. Nayak and M. A. Baluda ... 1217
Reproducible Plaquing System for Rabies, Lymphocytic Choriomeningitis, and Other Ribonucleic Acid Viruses in BHK-21/13S Agarose Suspensions. W. D. Sedwick and T. J. Wiktor ... 1224
New Assay Procedure for Separation of Mycoplasmas from Virus Pools and Tissue Culture Systems. Izabella Zgorniak-Nowosielska, W. David Sedwick, Klaus Hummeler, and Hilary Koprowski ... 1227
In Vitro and In Vivo Observations on a Murine C-Type Virus. William T. Hall, William F. Andresen, and Virginia J. Evans ... 1238
Vaccinia Virus Infection of Synchronized Pig Kidney Cells. Rose Mary Groyon and Alexis J. Kniazeff ... 1255
Immunofluorescence and Cytochemical Studies of Visna Virus in Cell Culture. D. H. Harter, K. C. Hsu, and H. M. Rose ... 1265
Localization of a Small Ribonucleic Acid Virus Within Cytoplasmic Cisternae. Yuan Chung Zee, Luciano Talens, and Adeline J. Hackett ... 1271

Bacterial Viruses

Molecular Recombination in T4 Bacteriophage Deoxyribonucleic Acid. II. Single-Strand Breaks and Exposure of Uncomplemented Areas as a Prerequisite for Recombination. Andrzej W. Kozinski and Zoya Z. Felgenhauer ... 1193
Sedimentation Analysis of *Pseudomonas putida* A.3.12 Bacteriophage gh-1 Deoxyribonucleic Acid. Lucy F. Lee and J. A. Boezi ... 1274

Author Index ... 1277
Subject Index ... 1279
Index to Date of Issue ... 1283

Antimicrobial Agents and Chemotherapy —1966

Proceedings of the Sixth Interscience Conference on Antimicrobial Agents and Chemotherapy

PHILADELPHIA, PA.
26–28 October 1966

Sponsored by the American Society for Microbiology with the cooperation of the Infectious Diseases Society of America and the Society for Industrial Microbiology

REPORTS OF ORIGINAL AND BASIC RESEARCH
Infectious Diseases; New Penicillins and Other Antimicrobials; Antiviral Agents and their Chemical Nature; the Mode of Action, Pharmacological Effects, and Clinical Evaluation of Antimicrobial Drugs

SYMPOSIA ON IMPORTANT ASPECTS OF INFECTION AND OF THE DEVELOPMENT AND APPLICATION OF ANTIMICROBIAL AGENTS
Chemical Modification and Identification of Antibiotics; Their Nonpharmaceutical Uses; Epidemiology of Drug-resistant Infections; Adverse Reactions to Drug Therapy; Management of Infection under Immunosuppressive Conditions

COMMUNICATIONS OF INTEREST
to all concerned with the development, study, and use of antimicrobial agents, to clinicians and microbiologists, chemists, biologists, pharmacologists, members of industry, etc.

A VALUABLE REFERENCE
for medical, scientific, and university libraries and for scientific investigators.

Gladys L. Hobby, *Editor*

772 pages $15.00 1967

To: **AMERICAN SOCIETY FOR MICROBIOLOGY**
115 Huron View Blvd., Ann Arbor, Mich. 48103

Please enter my order for ____ copy(s) of *Antimicrobial Agents and Chemotherapy—1966 at* $15.00 per copy.* (Available in Europe from the H. K. Lewis Co., Ltd., London.)

I also wish to order*:

_____ copy(s) of the 1965 volume at $15 per copy.
_____ copy(s) of the 1964 volume at $15 per copy.
_____ copy(s) of the 1963 volume at $12 per copy.
_____ copy(s) of the 1962 volume at $10 per copy.
_____ copy(s) of the 1961 volume at $10 per copy.
_____ Enter my standing order for future volumes.

☐ Bill me. ☐ Payment enclosed.

NAME_____

ADDRESS_____

* Members of ASM may purchase volumes at a discount of 50%, if payment accompanies order.
